# NM Hyper Shims

NM Hyper Shims are spacer washers that are mounted directly onto NM Hyper Meta without covering the hole pattern of the bracket. They are used to compensate for height differences and ensure correct fastening of the rail. Each shim is 4 mm thick, and up to four shims can be used per bracket, providing a maximum height adjustment of 16 mm. For adjustments over 8 mm (more than two shims), NM screw 30 mm must be used.

## Performance

Our products are designed and tested to make installation as hassle-free, easy and safe as possible. Feel free to contact us if you have any questions, and we will be happy to help you.

## Product details

Width	70 mm
Height	88 mm
Thickness	8 mm
Weight	40 g
