NM Charge Post

NM Charge Post is a flexible solution for all leading EV chargers. It can be equipped with one or two back plates, depending on whether it needs to support one or two chargers – which can be of different models. The post fits existing 60 mm pipes and foundations but comes complete with a new pipe. Terminal block kit (5-LED CU/AL IP23, max 25 mm²) is included as standard, further simplifying the installation. With its robust design, high-quality finish, and practical inspection hatch, NM Charge Post is easy to install and built to meet the needs of the future.

Performance

Our products are designed and tested to make installation as hassle-free, easy and safe as possible. Feel free to contact us if you have any questions, and we will be happy to help you.
