NM Flow Link

NM Flow Link is a universal mid clamp for solar panel installation on low-sloped roofs. It is compatible with all panel frames and designed to provide precisely balanced pressure during each installation. The clamp is placed between two panels, can be rotated for an optimal clamp zone, and is attached to the system's tall base module. Developed in accordance with panel manufacturers' guidelines for clamps and clamp zones, NM Flow Link ensures a safe and reliable installation.

Performance

Our products are designed and tested to make installation as hassle-free, easy and safe as possible. Feel free to contact us if you have any questions, and we will be happy to help you.
